

OpenMT

Version 20250917 Beta
By Rick KD0OSS
(Subject to change.)

- Modem Host runs on PC that modem is connected to.
- Modem Host may be tailored to modem but uses standard application interconnect protocols.
- Protocol/Gateway services can run anywhere with network.
- Frame and Control packets used between services.
- SQL database used for configuration and data collection.
- Web based Dashboard for monitoring and configuration.
- Minimum hard coded variables used in modem firmware.

Minimal Packet Header 5 bytes

Start	Size	Size	Type Size	Type
0x61	0x00	0x05	0x01	0xNN

Byte 1: Packet start 0x61
Byte 2: Total message size (MSB)
Byte 3: Total message size (LSB)
Byte 4: Message type size
Byte 5: Start of message type
