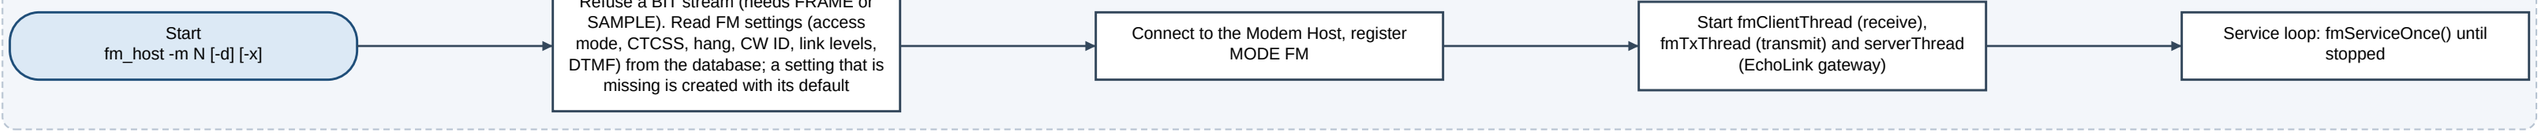
FM Host (fm_host) - flow chart

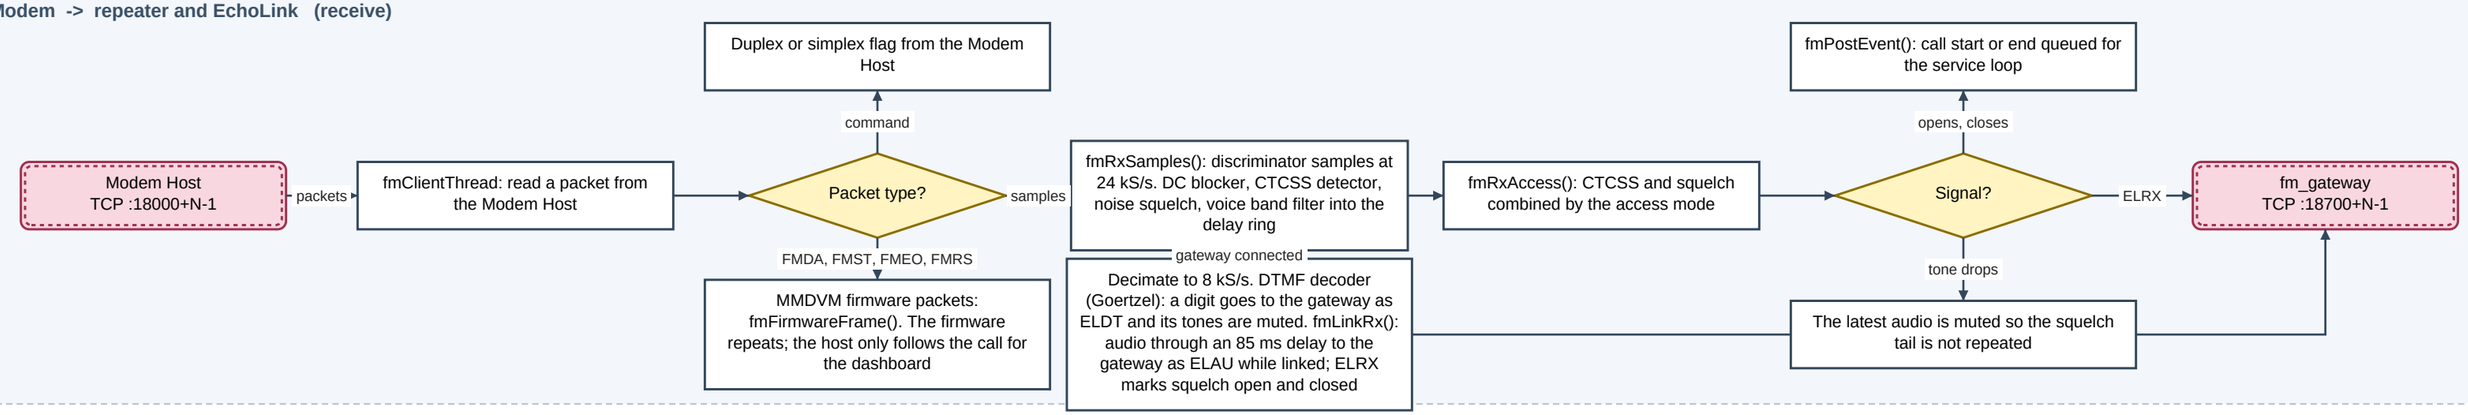
OpenMT - Rick KD0OSS

Analog FM repeater with an EchoLink link. Talks to the Modem Host on :18000+N-1 and to fm_gateway on :18700+N-1. Not available on a BIT (OpenMT_HS) modem; the EchoLink link needs a SAMPLE modem.

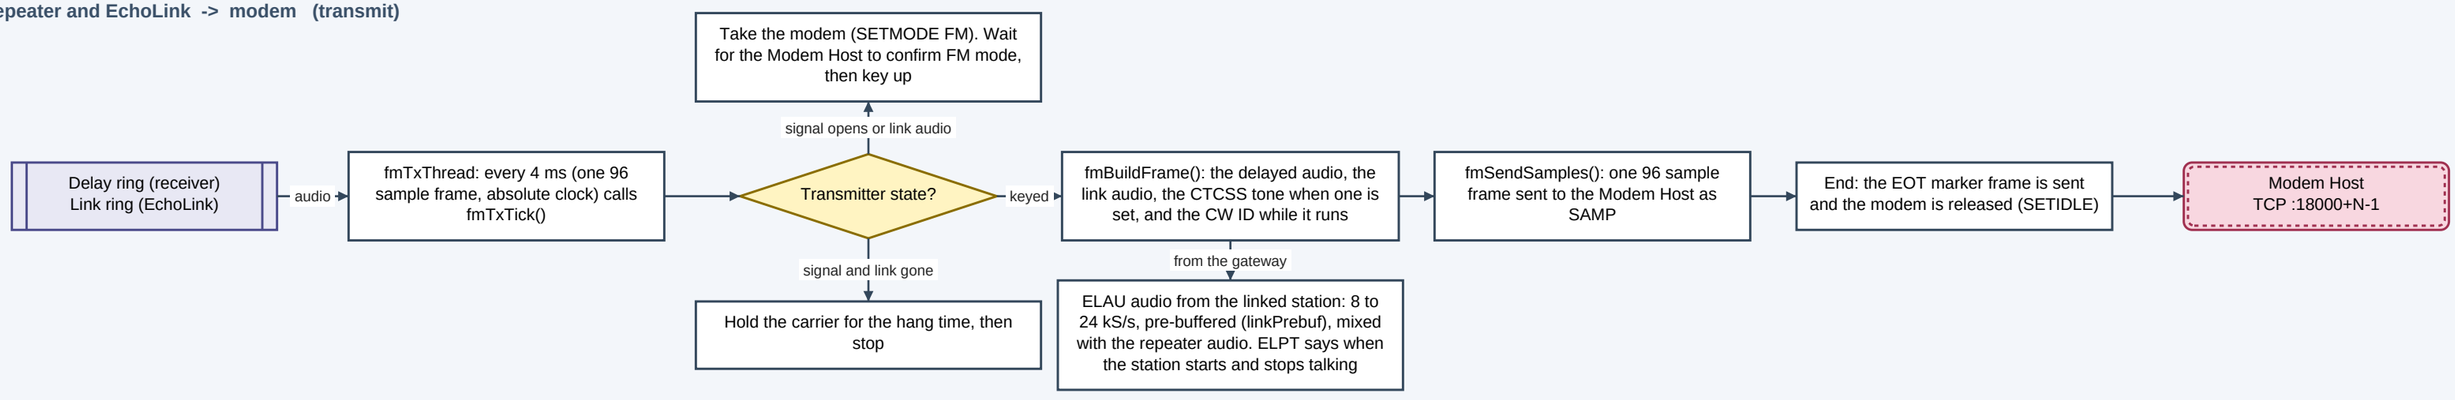
main() - start-up



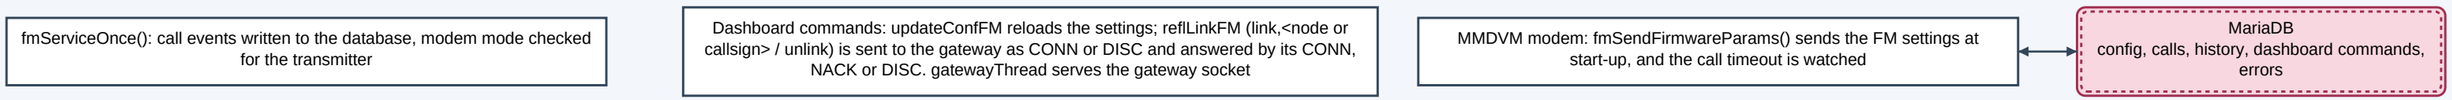
Modem -> repeater and EchoLink (receive)



Repeater and EchoLink -> modem (transmit)



Timers, dashboard commands and the database



Key

step · decision · start / thread · outside / database / network · modem hardware · queue / buffer

With a FRAME (MMDVM) modem the firmware does the CTCSS and repeater work itself and there is no EchoLink link; with a SAMPLE modem this host does it in software. Errors go to the error log with reportError().
