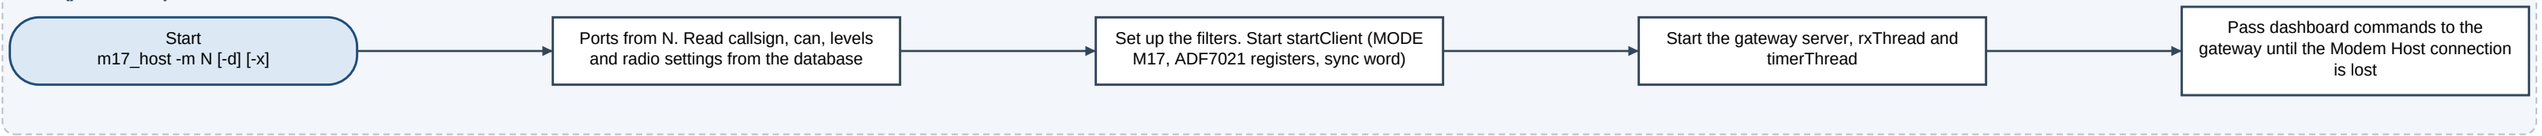
M17 Host (m17_host) - flow chart

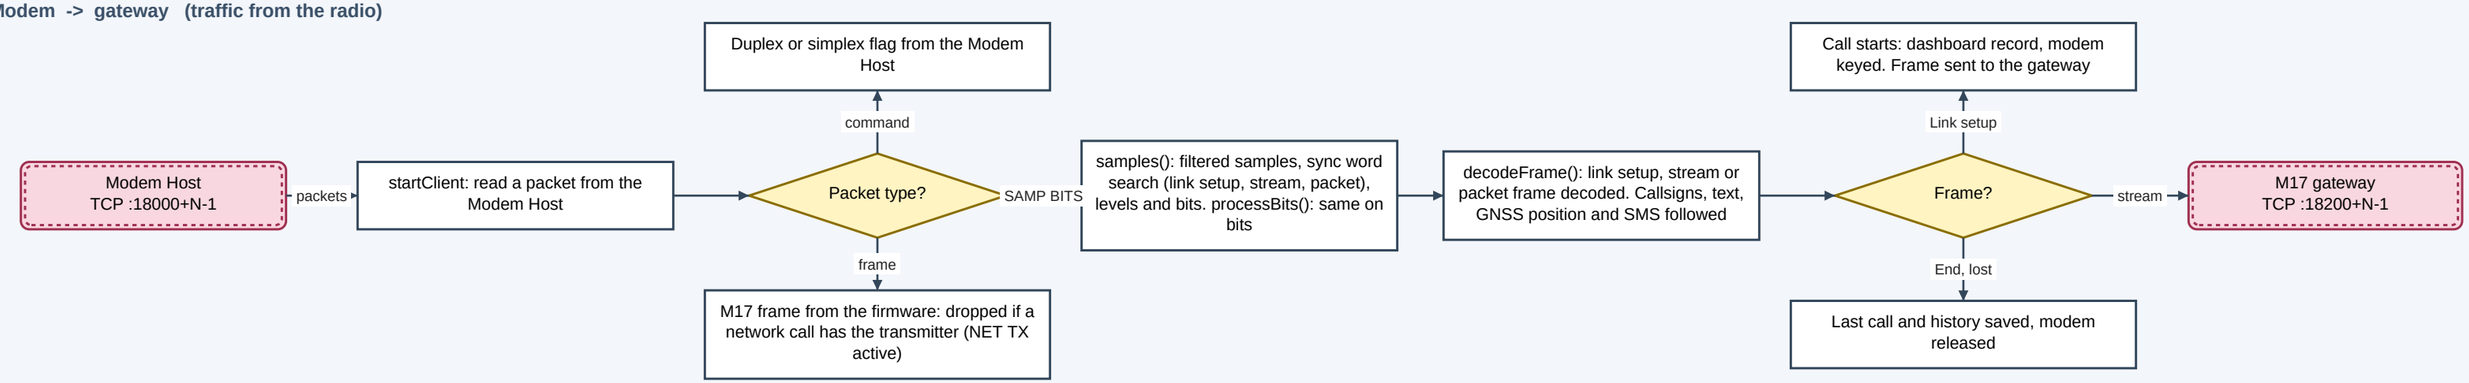
OpenMT - Rick KD0OSS

Talks to the Modem Host on :18000+N-1 and to the M17 gateway on :18200+N-1 (the gateway links to an M17 reflector).

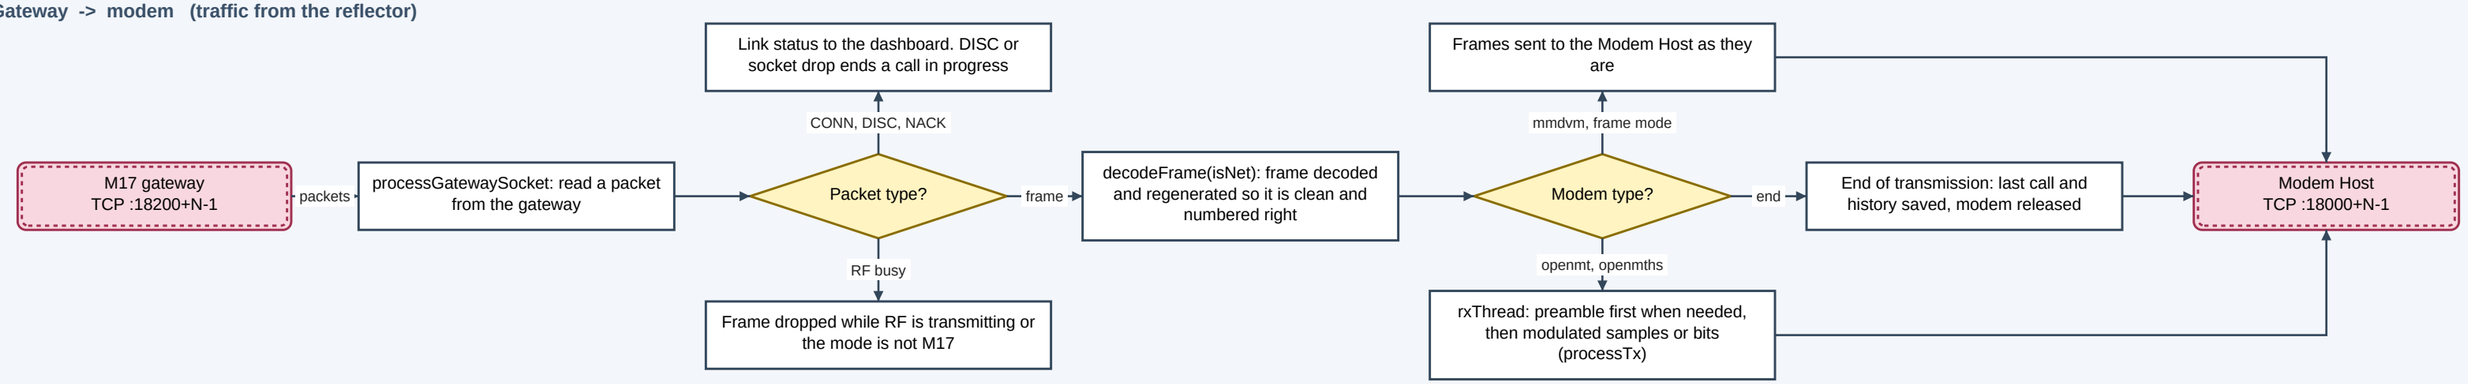
main() - start-up



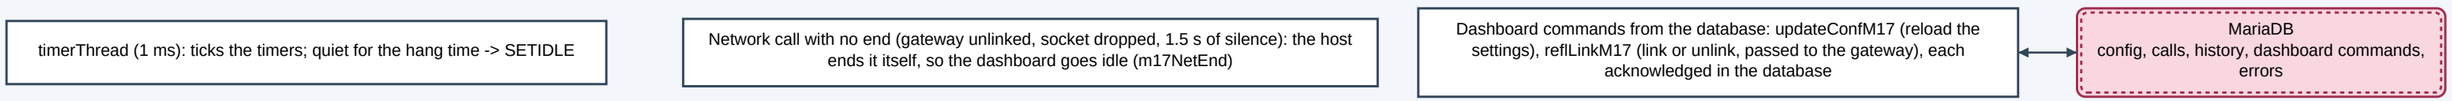
Modem -> gateway (traffic from the radio)



Gateway -> modem (traffic from the reflector)



Timers, dashboard commands and the database



Key

currentTxSource says who has the transmitter (RF or network); frames from the other side are rejected until it is free. Errors go to the error log with reportError().
